EnterTech Foundation – Volunteer Tutor

EnterTech Foundation is a non-profit organization with a mission to make a safe haven for our youth and adults to learn and interact through our educational, skill building and fun fill programs. Our focus and determination is to prepare our undeserved urban communities for success by offering the necessary support. We believe by building a strong community network in the heart of the city, positive change will occur to combat and solve many of the community's problems. Our board members have over ten years of experience in program developments for youth and community projects.

We are seeking tutors for our Tutoring Program. Tutors will assist students with homework and provide enrichment activities to help students develop academic skills and knowledge. Each tutor will work with 1-3 students each session and assist the Program Coordinator with maintaining student records. We are seeking tutors with strong personal academic records, enthusiasm, passion for teaching youth, good communication skills, self-motivated with good time management skills and are able to work well with a team.
