

Interactive Tutorials for Information Literacy: Articulate Storyline for Asynchronous Learning

Nicole DeSarno and Adam Shambaugh – Temple University Libraries

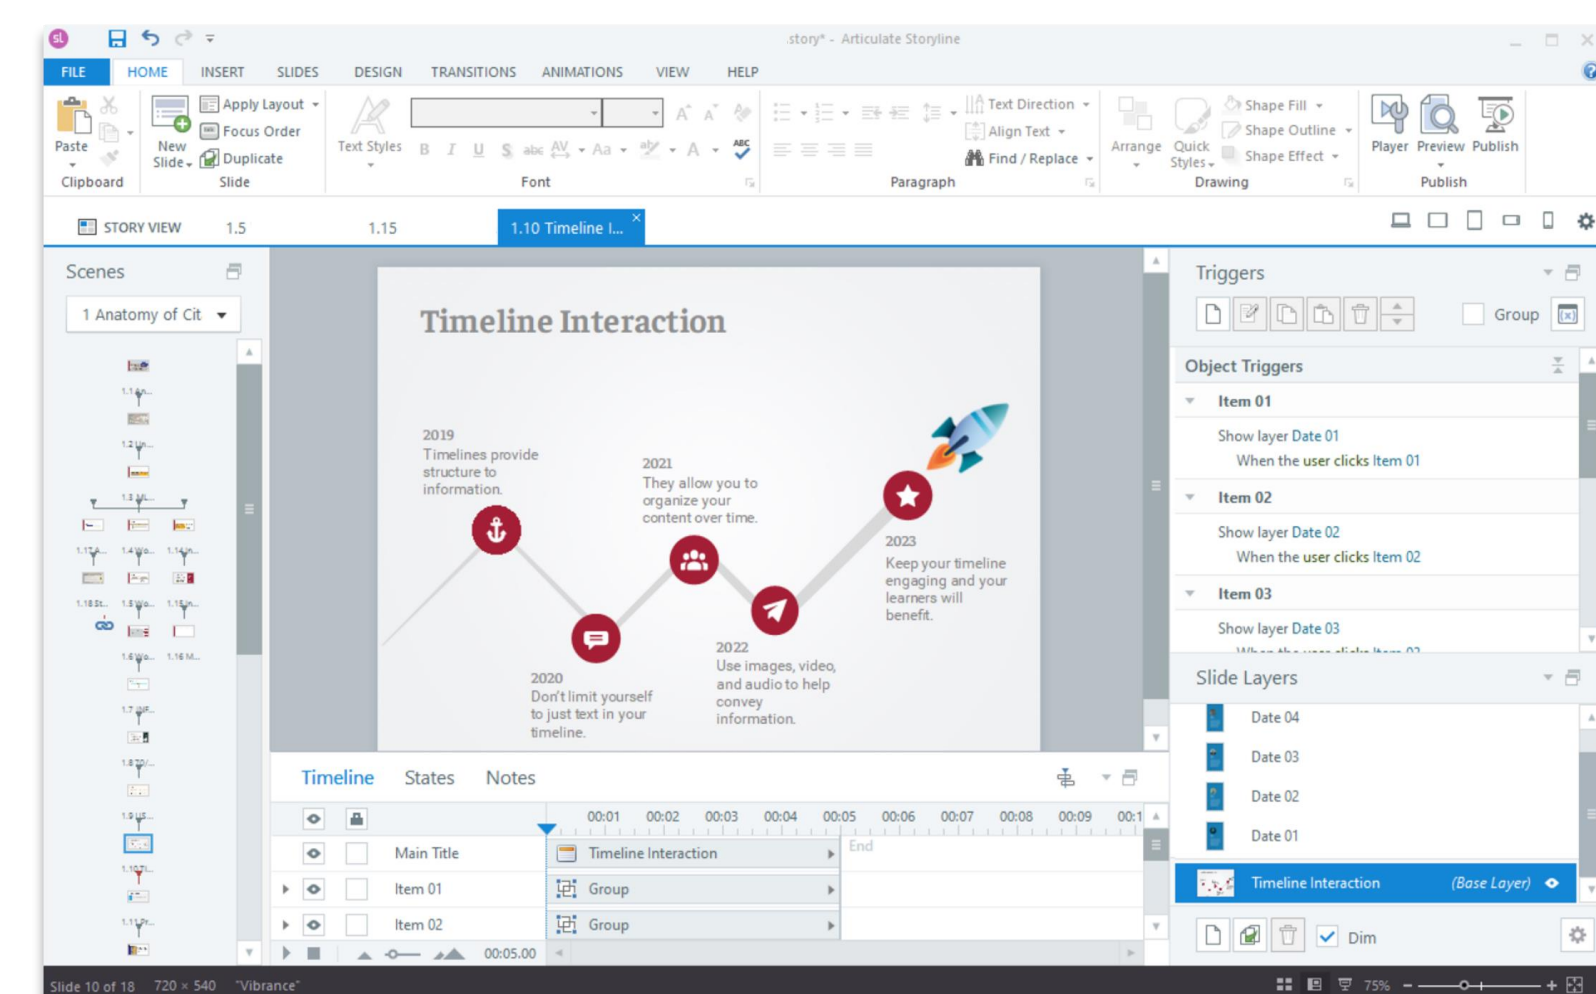

Introduction

Articulate Storyline is a software platform that enables educators to create interactive tutorials incorporating audio, video, and embedded quizzes to improve students' understanding of discipline-specific concepts, reinforce material presented in class, and assess student learning.

In 2020, Temple Libraries' introduced its TUL Tutorials Page, a collection of self-paced tutorials covering information literacy topics. Since the launch of this page, new tutorials have been added, and library subject specialists have collaborated with their departments to create discipline specific tutorials.

Articulate Storyline

- Allows instructors to create interactive electronic tutorials
- Features a variety of quiz question types that assess student learning
- Enables students to learn at their own pace
- Saves instructors time by covering new content and concepts outside of class
- Tracks students' understanding of material presented

Benefits

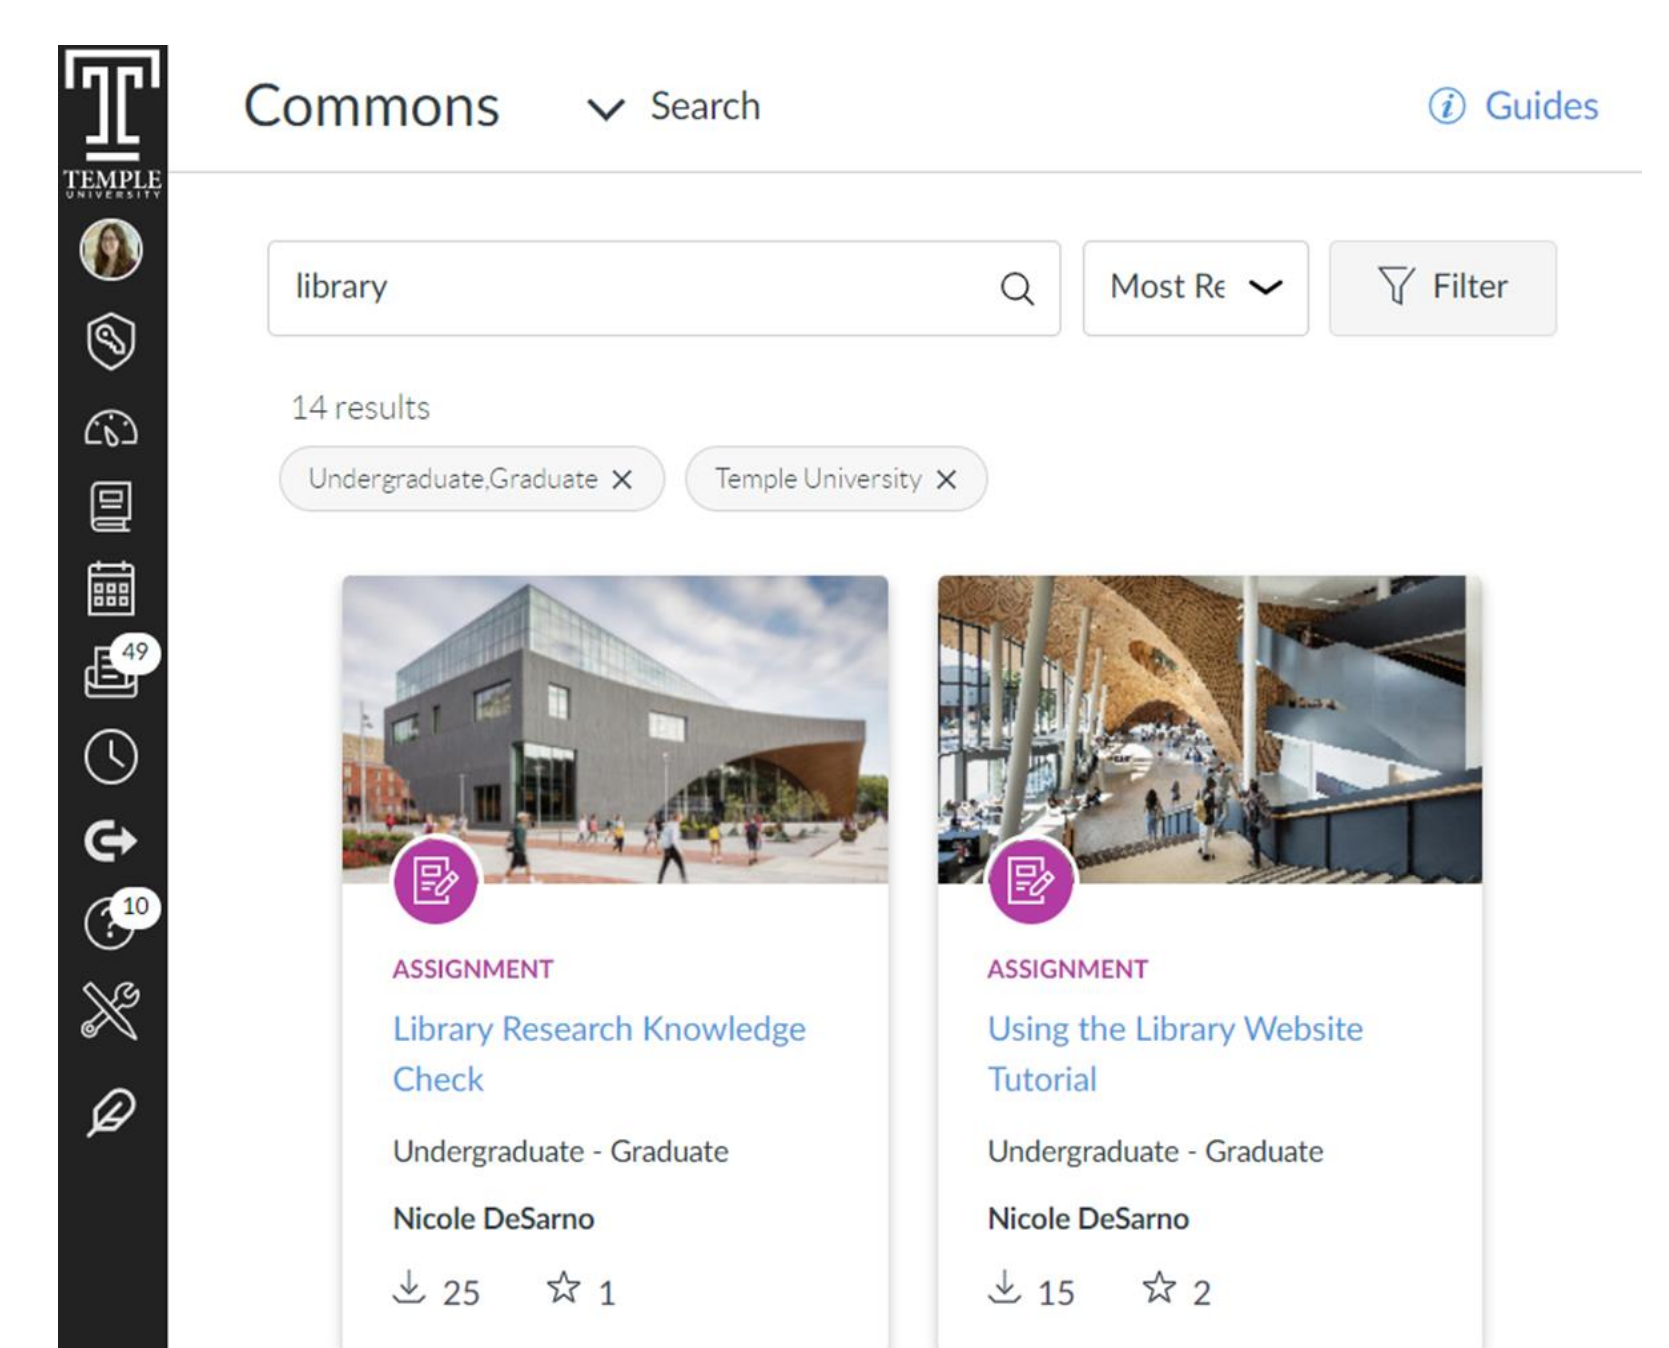

Research suggests that supplementing classroom content with self-paced tutorials can improve students' understanding of challenging concepts.

Interactive tutorials allow students to process information at their own pace and receive real time feedback about their understanding of new material.

Online tutorials enable students to review course content as needed throughout the semester.

Unlike static learning materials, online learning tutorials can be modified and remixed to meet the needs of specific courses and learners.

Embedding interactive tutorials in Canvas may be especially useful for improving student engagement with distance students.

User Feedback

"it was very fun and interactive haha i was prepared to feel bored and skip through but i enjoyed it more than i thought!!!"

"It was easy to follow and not overwhelming."

"It was easy to follow along and interactive which kept me engaged with the material"

"The tutorial was well paced and not too packed with information and therefore was easily digestible"

"Love that Temple is being proactive to make sure all students know how to use techniques and tools to be successful that they have access to and most likely did not know"

"I think its a good interactive tutorial that is a perfect length to teach something new."

"Thank you for putting in the time to share this information with us :)"

"The information was informative and I feel if I need more information, I know where to go."
