

**Are you or someone you know aged 65 or older and have difficulties with daily activities due to memory/thinking problems?**

If so, you may be eligible to participate in a research study on activities of everyday living.

**What's involved?**

Participants with mild to moderate memory or thinking problems will be asked to participate in this study for 4 weeks. Participants must live with a friend or family member who is also willing to participate in the study. The study will be completed in your home. Participants and their family member/friend will be asked to do the following:

- 1- Complete an initial assessment of thinking skills
- 2- Monitor your everyday activities;
- 3- Use a smartphone to help you remember to do an everyday activity for a two-week period
- 4- Report on your impression of the smartphone
- 5- The participant's close friend/family member also will be asked questions about the participant's functioning and will be asked to help maintain the smartphone during two weeks of the study

TOTAL STUDY TIME = 4 weeks.

You will be compensated up to \$150.00 for your time by the end of the study and your study partner may be compensated up to \$125.00.

**Where do I go to do the study?**

The study will be performed in your home. A research coordinator will visit your home 2-3 times during the study period to ask you and the study partner questions. Participants and their partners also will be asked to contact the study team once per week by phone/text/email.

**How do I sign up?**

You or your friend/family may call (484) 843-1321 to determine if you are eligible. Please leave a message and someone will return your call promptly!
