

## **Forecasting Fiscal Futures for Pennsylvania School Districts: Where Law and Current Policy Are Taking our Public Schools**

By William Hartman and Timothy Shrom

A Policy Brief from the Center on Regional Politics, Temple University

The purpose of the study was to project the fiscal future for all 500 Pennsylvania school districts from 2013-14 through 2017-18 based on continuing existing laws and fiscal policies. The major revenue sources and their trends were compared with the mandated and necessary expenditures and their trends. In the projections, when a district's expenditures exceeded its revenues for a given year that indicated a "shortfall" or operating deficit. However, this is not an indication that this district will become insolvent or bankrupt. Rather it is a measure of the severity of the fiscal stress the district is facing and the magnitude of program cuts the district will be forced to make.

This study was completed in October of 2014. At that time, the latest available school district financial data from the Department of Education (PDE) were for the 2012-13 fiscal year. Consequently, the study projected the next five years beginning in 2013-14 through 2017-18. Conservative assumptions were utilized throughout the study; recent year trends of actual data through 2012-13 formed the basis of the projections. Understandably, at this point there is nearly a two year lag between the early year projections and school districts' actual results. In some cases, a district's early trend may be too low or too high in the first projected year, thus impacting out-year results. So while the study methodology may show early negative numbers that continue to increase, school districts in the real world and by law must adjust their budgets, largely by reducing expenditures, to maintain an annual balanced budget.

In May, 2015, PDE posted actual 2013-14 fiscal year data. In comparing the 2013-14 projections with actual 2013-14 data, an early review indicates the trend assumptions for pension costs and tuition payments to charter cost to be very accurate. Statewide total actual salaries in 2013-14 fell by nearly ½ of 1%, while the projections increased them by ½ of 1%. Health care and other costs fell in 2013-14 as opposed to a trended cost increase. On the revenue side, it appears that the total local revenue did not grow as much as projected (2.5% v. 2.9%), offsetting some of the lower actual salary and health care trends. In sum, the study's overall projections appear sound. These more recent actual results will be used to update the study and fine tune trend assumptions in a forthcoming second study.
