Imagine you are out with your friends at a fun sporting event, concert, or other activity. Describe something you see that is an example of Newton’s first law in action. How does your example illustrate Newton’s first law? Explain what is happening in a way that demonstrates your understanding of this concept. The more creative and funny, the better!

Scoring Rubric

1 Point: Student does not apply Newton’s 1st Law or does not apply it correctly to the question.

2 Points: Student applies Newton’s 1st Law but does not thoroughly explain the relationship between the 1st Law of Motion and the example given in the question.

3 Points: Student correctly applies Newtons 1st Law of Motion to the question and thoroughly explains the relationship between the 1st Law of motion and the example given in the question.
